SITUATION SUMMARY

<u>Lightning Strikes, Venice Beach and Catalina Island</u> (New/Final)

At approximately 1630 hours the California State Warning Center became aware of reports that a lightning strike had occurred in Southern California, resulting in multiple injuries.

- The Cal OES SDO indicates that 13 people were evaluated at Venice Beach and in Catalina, 1 person was struck and they are okay. Cal OES LDO advised per LAPD, 8 were transported, 1 in full arrest and 1 unconfirmed fatality. Los Angeles County advised that they did not declare this a mass casualty incident (MCI).
- There were no weather warnings in effect for the Venice Beach / Catalina Island area this afternoon. Weather Warnings received this afternoon and evening (Local Warning Points have been briefed):
 - Flash Flood Warning in effect until 1930 hours for portions of San Bernardino County
 - Flash Flood Warning in effect until 2130 hours for portions of Inyo County
 - Flash Flood Warning in effect until 1745 hours for portions Riverside and San Diego Counties.
- Afternoon Thunderstorm Activity Forecast, per Oxnard Weather:
 - Experiencing some isolated storm activity in the Los Angeles Basin, they are still expecting a thunderstorm threat this evening in the deserts. Additionally, they are expecting some activity across the coast this evening.
 - Per NWS, they do not anticipate issuing any weather watches or warnings for the Los Angeles area this evening.

"Century Crunch," Los Angeles International Airport (LAX) (No Change)

Starting Friday night 7/25, the intersection of Century and Aviation Boulevards in Los Angeles City will be closed for 57 hours to allow crews to demolish an old railroad bridge and begin construction of a new Metro station. Century Boulevard is a major access route for Los Angeles International Airport (LAX). The closure is expected to last from 2100 hours Friday until 0600 hours Monday. Local detours are available, but due to the heavy regular traffic flow, delays are expected.

Cal EOC Incident – 2014 Drought

SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

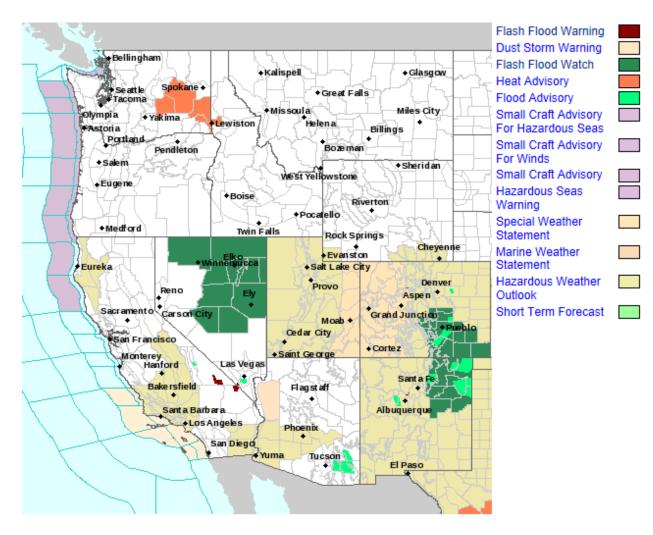

NORTHERN CALIFORNIA:

An area of mostly dry thunderstorms offshore near Monterey was forecast to move across the Bay Area this afternoon. New ignitions are possible with this event. Isolated thunderstorms are also possible over the higher terrain (5000 ft +) just about anywhere through Monday. A northward-moving disturbance will increase thunderstorm chances and intensity starting late Monday afternoon in the southern end of the Sierra, spreading northward overnight, and over a large portion of Northeast California, Tuesday afternoon. Thunderstorms late Monday and Tuesday will produce around 0.50 inches of rainfall with a direct hit, but dry strikes and new ignitions are also expected. Beyond Wednesday it appears that only isolated thunderstorm activity will occur in northern and eastern areas, with more active storms just to the north and east of Northern California.

SOUTHERN CALIFORNIA:

Disturbances moving around the high pressure center over New Mexico will bring scattered showers and thunderstorms to the mountains and deserts through Monday evening. It is also possible that isolated showers and thunderstorms could move over the coastal and valley areas during this time. Dry southwest flow aloft will end the shower and thunderstorm threat over Southern California by Tuesday, but scattered afternoon showers and thunderstorms will continue over the Sierra through Wednesday. Dry conditions are expected across the entire region by the end of this week. There will be little change in temperature through the end of this week, with 80s to low 90s in the mountains and mid 90s to 105 in the valleys. Minimum humidity will increase through Monday when it will be 20% to 40%, and then slowly decrease through Friday. Winds will continue to be light, except strong downdraft winds will be possible in and near any thunderstorms.

Road Closures

Hard closure of Sand Ridge Road

Utilities

There are 151 residences without power in the Sand Ridge area.

Critical Infrastructure (including Hospital and Medical Facilities)

- El Dorado Irrigation District (EID) has a small diversion dam and pump located on the middle fork of the Cosumnes River off of River Mist Lane and Outtingdale Road. This pump is utilized to pump water out of the River to a water treatment plant. The treated water is then pumped to two storage tanks totaling 150,000 gallons. The storage tanks provide water to 191 connections in the Outtingdale area. EID is estimating the replacement cost of this infrastructure at \$2.5 million and currently preparing an emergency plan in the event that the fire damages any of their pumping infrastructure or if there is an extended power outage.
- Two public safety radio towers are threatened by the fire and an initial estimated replacement cost of this infrastructure is \$650,000.
- The California Department of Public Health (CDPH), Division of Licensing and Certification (L&C)
 advises there are currently no licensed health care facilities affected by the fire and will continue to
 monitor the incident for impacts.

Cal EOC Incident – 2014 Drought

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce out door urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.
 http://www.waterboards.ca.gov/publications forms/publications/factsheets/docs/emergregsurban fs07221 4.pdf
- Current Reservoir Levels continue to decline. Pine Flat had a 4% decrease from last week. Levels as of July 22: Don Pedro 46%; Exchequer 22%; Folsom Lake 43%; Lake Oroville 37%; Millerton Lake 55%; New Melones 27%; Pine Flat 19%; San Luis 25%; Lake Shasta 36%; Trinity Lake 38%; Pyramid Lake 92%; and Castaic Lake 46%.

Cal EOC Incident - 2014 Drought

Situational Summary

- On July 15, 2014, CDFA in partnership with U.C. Davis Center for Watershed Sciences released a study titled Economic Analysis of the 2014 Drought for California Agriculture. The study indicates the drought in California is the third most severe on record and is responsible for the greatest water loss ever seen for the state's agriculture, and river water for Central Valley farms has been reduced by roughly one-third, according. Direct costs to agriculture total about \$1.5 billion (which include revenue losses of \$1 billion and \$0.5 billion in additional pumping costs). This net revenue loss is about 3% of the state's total agricultural value

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
